Check user in specified field is in specified role condition

Condition to allow only if the user in specified field is in the specified role.

To add **Check user in specified field is in specified role condition**, go to the transition of your workflow, switch to **Conditions** tab and click on **Add Condition** button.

Select **JEP - Check User In Specified Field Is In Specified Role Condition** and click **Add** button.

Select user field/custom field and the project role. Then click **Add** button.

That's it, the condition is added to the transition.
Please do not forget to publish the workflow.
