**Parent issue JQL condition**

Condition to allow only if the parent issue matches specified JQL.

To add **Parent issue JQL condition**, go to the transition of your workflow, switch to **Conditions** tab and click on **Add Condition** button.

Select **JEP - Parent Issue JQL Condition** and click **Add** button.

Add **JQL Query**:

```
resolution IS NOT EMPTY and reporter = currentUser()
```

Type JQL that should match for the parent issue, in order to allow the transition. Then **Add** button.

That's it, the condition is added to the transition.
The parent issue should match this JQL: `resolution IS NOT EMPTY and reporter = currentUser()`.

Please do not forget to publish the workflow.
